

Special education workflow for vision

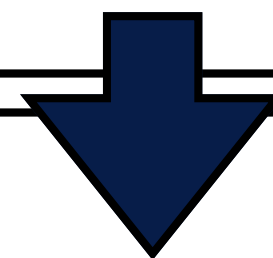

The evaluation team determines that vision must be considered.

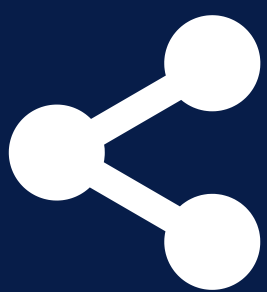

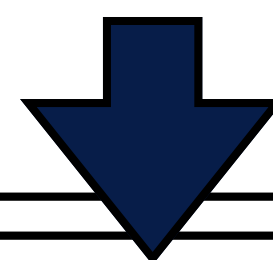

The classroom teacher completes Vision symptoms questionnaire (VSQ).

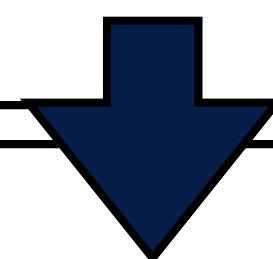

The teacher sends the VSQ to the school's Designated Vision Point Person (DVPP).

The DVPP reviews the VSQ and determines the next steps:
a) Tier-two vision screening
b) Referral to an eye care professional
c) No additional screenings needed

The DVPP shares relevant results with the evaluation team

The evaluation team continues its work.
